ROUNDTABLE QUESTIONS

Question 1:

What should incident preparation and exercising look like in order to minimise attack impact; should it be 1) technical, 2) executive or 3) both to achieve the most effective return on time and investment?

Question 2:

Evolving attacks – what lessons have we learned over the last year from our/our clients' response to cyber incidents and from how they overcome their challenges at these times, so we can help clients and teams better prepare?
