BREAKOUT ROOMS

QUESTION 1

The last few years has seen a series of global catastrophe losses, from windstorm to flood and the latest being COVID-19. As individual companies and as a reinsurance market, are we better placed to handle these – from assessment, ongoing management and payment?

QUESTION 2

Which of today's losses has the potential to create tomorrow's legacy portfolio?

QUESTION 3

How mature is the reinsurance market when it comes to embracing new tools and technologies which capture valuable data and how do you feel these can materially improve the way the Market operates and the response to our clients?
